## ***“I Lost Everything — Then Built a Better Way to Shop Amazon with Just AI”***

DealShopperPro.com is a powerful Amazon search tool created by one individual using only AI — no team, no funding, and no background in coding. After losing everything to Hurricane Ian and rebuilding life from scratch, the founder used ChatGPT to build a tool that helps shoppers filter Amazon deals in ways the platform doesn't allow. The tool is fast, free, and helps users find Prime-only items, Lightning Deals, and coupon-stacked offers in seconds.

### ***About the Founder***

After surviving a coma, paralysis, and the loss of his home during Hurricane Ian, the founder of Deal Shopper Pro became obsessed with rebuilding life using online tools. With no money or formal training, he used ChatGPT to create DealShopperPro.com — a free tool that now helps users cut through the noise and instantly find Amazon deals that actually matter.

### ***About Deal Shopper Pro***

DealShopperPro.com is an independent tool for searching Amazon with filters most shoppers don't know exist. Users can search by keyword, price range, discount percentage, Prime-only items, hidden coupons, and more — all in one place.
